CONCRETE BENCH 9

Double concrete bench in which the supporting elements are in a shape of an anchor and made of high-performance reinforced fiber concrete. The concrete legs are with embossed surface of natural aggregate. The structure is made of marble or granite stones of a certain size in different colors. The wood from which the boards are made is certified and specially treated. This retains the material's characteristics over time and prevents it from rotting. The fasteners are from stainless steel. The embossed concrete surface is additionally coated with varnish, which mak ...
