## CONCRETE BENCH 268 A

873.22 €

The **268-A** model is part of the 268 series of modular concrete benches. It can be used both independently and in combination with other elements of the series. The bench is made of high-strength, reinforced, fiber concrete with a homogeneous aggregate structure. The structural particles are of a precisely defined size. Their combination in various colors determines the primary textures: white, scatter, gray, or brown. The polished surface in the seating area creates a velvety touch, while the fine relief on the sides adds character and style. All surfaces are treated with protective coatings, providing additional resistance to atmospheric influences. With its clean design, this versatile model is ideal for various urban spaces: parks, alleys, squares, schoolyards, relaxation zones, and more.

**Diameter:** 200.0 cm

**Length:** 50.0 cm

**Height:** 45.0 cm
