CONCRETE BENCH 268 B ER Resysta exposed aggregate

Bench model **268-B** is made from high-strength fiber-reinforced concrete with a homogeneous aggregate structure of natural marble or granite stones. The structural aggregates have a strictly defined size and color range, determining the main textures: white, scatter, gray, or brown. Various technological methods of treating the concrete surface create a delicate combination of fine polish and subtle relief. The metal components making up the seat and back of the bench are made of stainless steel. The seat and backrest are made from premium wood, available in t ...
