

# Creating Brands of the Future

## CONCRETE BENCH 233 ES Resysta exposed aggregate

The bench is made of high-performance reinforced fiber concrete and an aggregate consisting of natural marble or granite stones. The aggregate structure can be finished in different color combinations. The surface is completely polished. For greater comfort, the seat is designed with exotic, solid bamboo wood. Certified wood and concrete are further treated with a protective coating, which makes the product even more resistant to aggressive weather conditions. The design combination between the two materials is a stylish solution for any city.
